Richard Dennison already has a blog on this subject and he provided the CAS number.

<http://blogs.edf.org/health/2014/01/11/failed-tsca-collides-with-the-real-world-in-west-virginia-chemical-spill-this-week/>

The only hit on CDAT is CDR related:

- **Chemical/Generic Name:** Cyclohexanemethanol, 4-methyl-
- **CAS Number:** 34885-03-5
- **Company:** EASTMAN CHEMICAL CO INC
- **Site:** EASTMAN CHEMICAL CO. B-280 OFF, 200 SOUTH WILCOX DRIVE, KINGSPORT, TN, 37660-5147
- **Manufactured:** CBI
- **Imported:** No Data Reported
- **Is the chemical never physically at the import site? :** N/A
- **Volume used on the site :** CBI
- **Past Production Volume :** CBI
- **National Production Volume for Chemical :** Withheld

So – I should be slower about these things. Ryan just told me that there are several people looking into this in CCD. I will get you the information that you need later today, or at least loop you into the other ongoing efforts so you do not duplicate what they have done.

I am not but I will be in the office tomorrow. Do you have the specific chemical name or CAS number? We can check CDAT to see if there are any related 8(e)s or other doc types if we have a valid identifier.

I had a quick conversation with Matt about the MCHM issues in West Virginia. Matt did say that there was a CBI CDR filing on the submission, but we discussed the possibilities about CBI 8(e) fillings. If you are in the office this week, can you look into this? Just let Matt know what you find.

Thanks!
